

MDB XS – management A

GB

Technical description:

The Fiber Optic Box MDB XS provides speedy and efficient customers connection and convenience with built-to-last features. The box is easy to open and close with minimum operation keeping increased water / dust ingress resistance and can be used outdoors (at distribution points on poles or walls) or indoors (as a multi-dwelling-unit or a property basement optical distribution box). It's adaptable to all PON topologies and can accommodate any cable application with modular grommets for all cable diameters.

Type: MDB XS – management A

Colour: RAL 7035

Dimensions: 256x181x85mm

Accessories:

Accessory bag 1pc

Declaration on product conformance:

The product was manufactured in compliance with valid technical documentation. An observation of designed technology procedures and material was followed according to the ISO 9001 standard.

Warranty:

The manufacturer guarantees for product imperfections arised within period of warranty due to the demonstrably deficient material, error in design, or deficiencies in manufacture. Such a deficiencies shall be repaired by the manufacturer free of charge. 5. Lock installation.	15
6. Closing the lid with a screw.	16

1. Wall / pole / cable holder mounting.

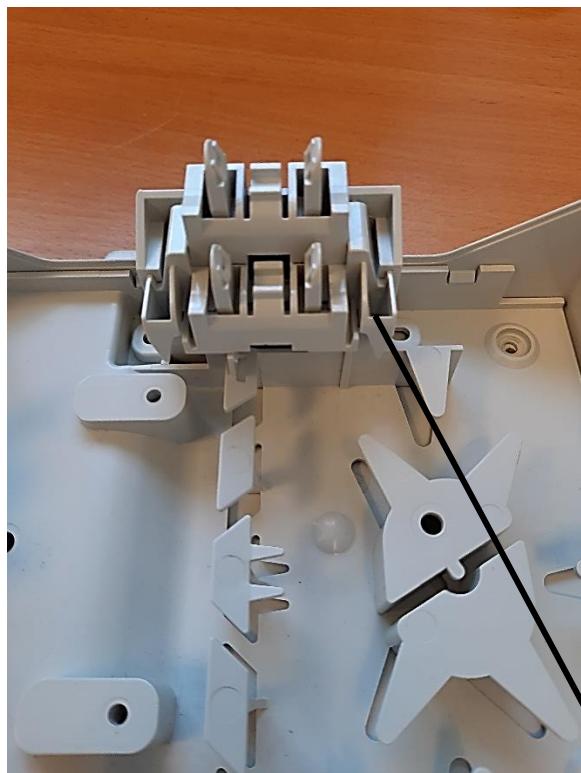

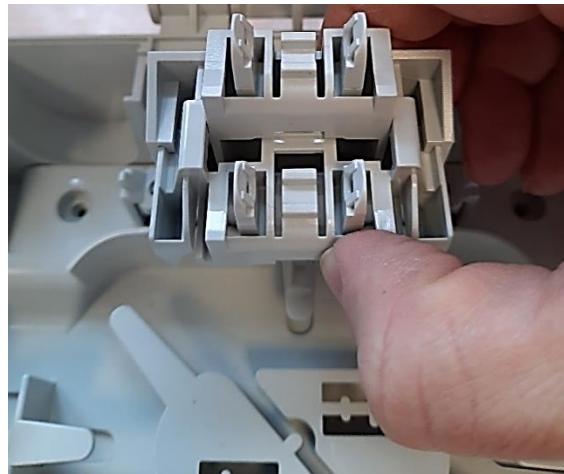

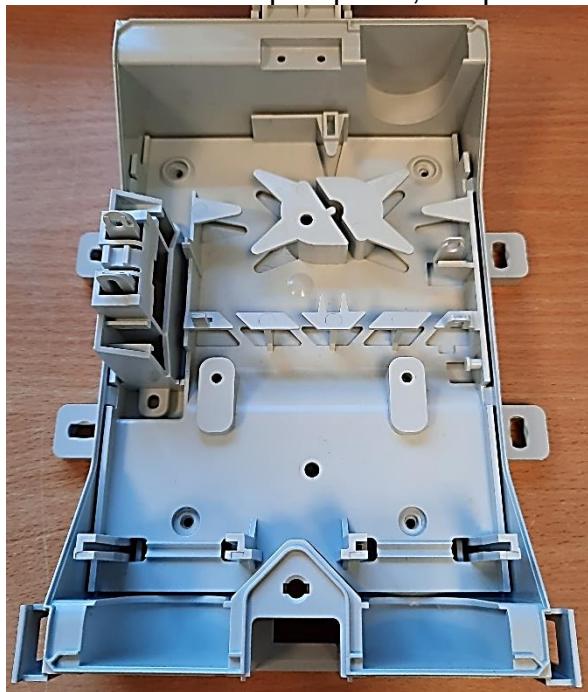

2. Clicking the pin, insert trays.

Insert 1 pin for 2 trays.

In the case of the adapter panel, the pin does not click.

The pin is seated
correctly after an audible
click.

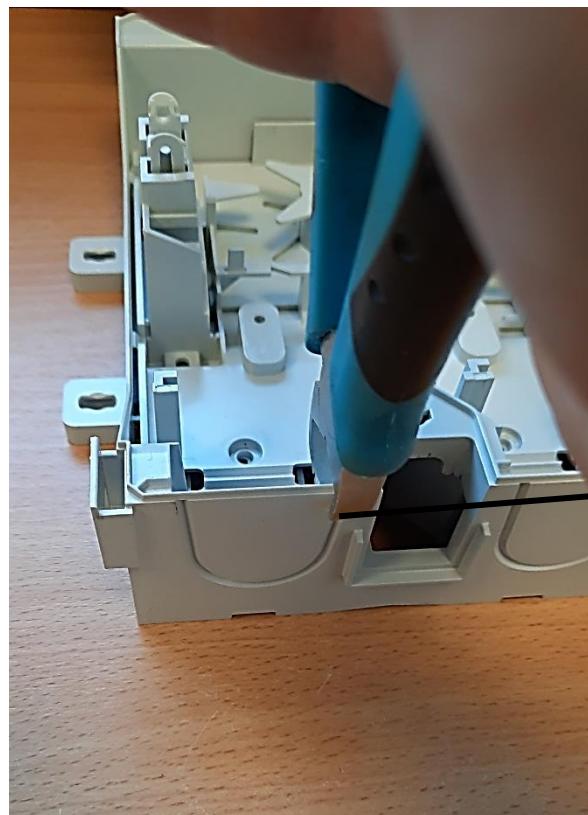

3. Grommet installation, cable fixation.

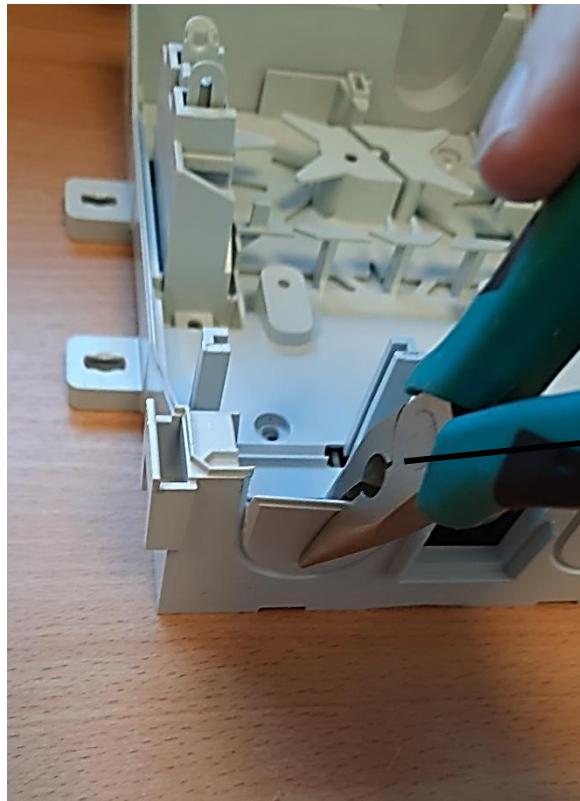

Cut off the plugs as required, start always from the bottom.

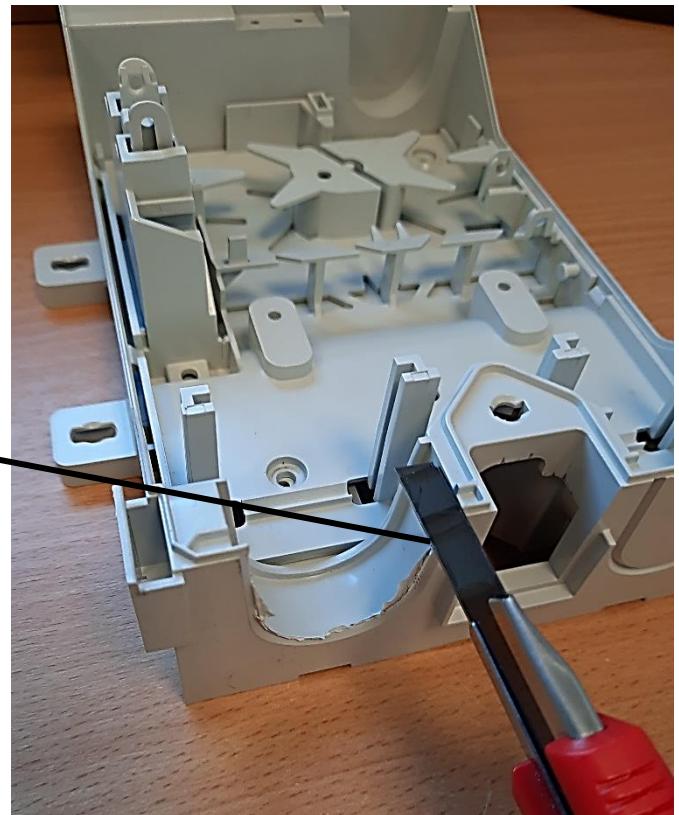

As required we keep cutting from the circuit to the holes marked.

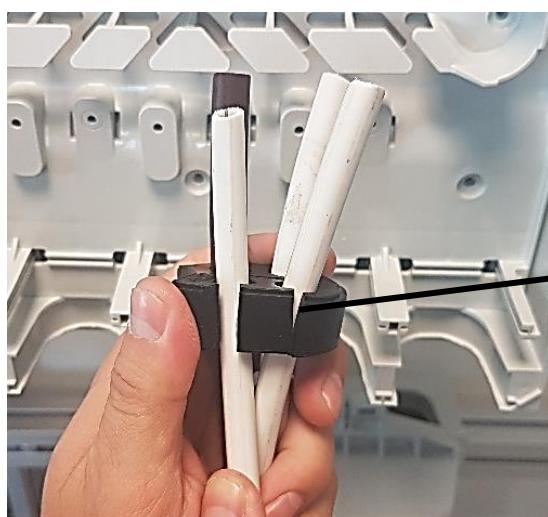

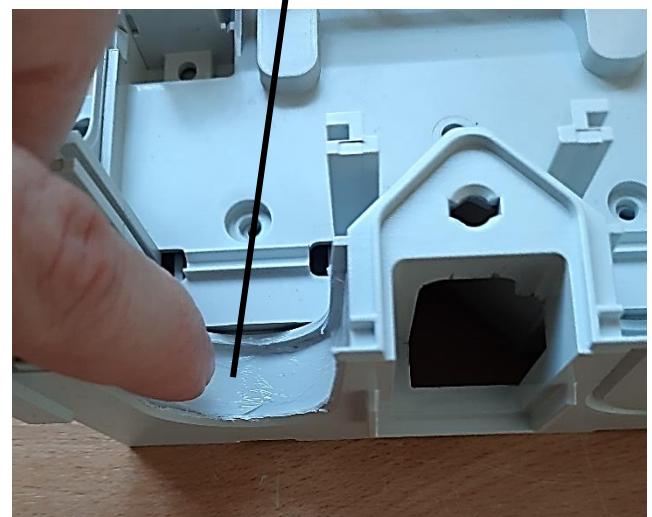

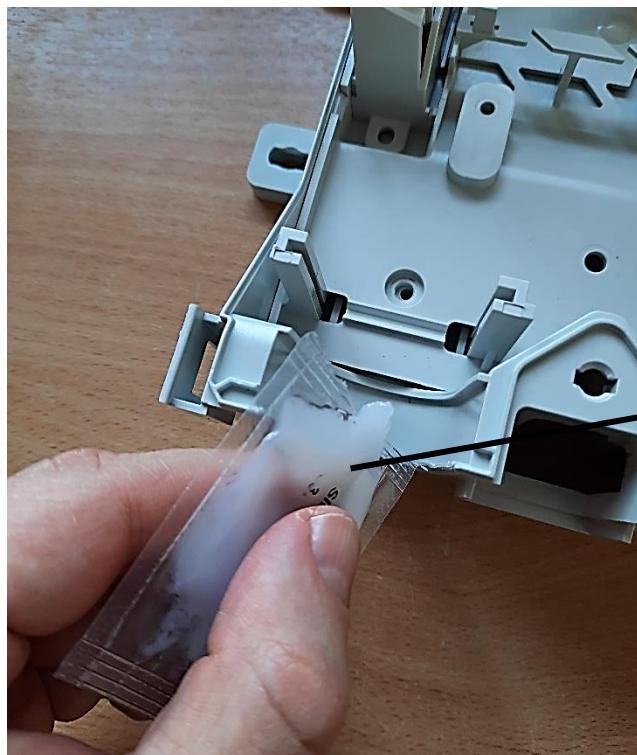

To break out the covers use the pliers, cut on both sides.

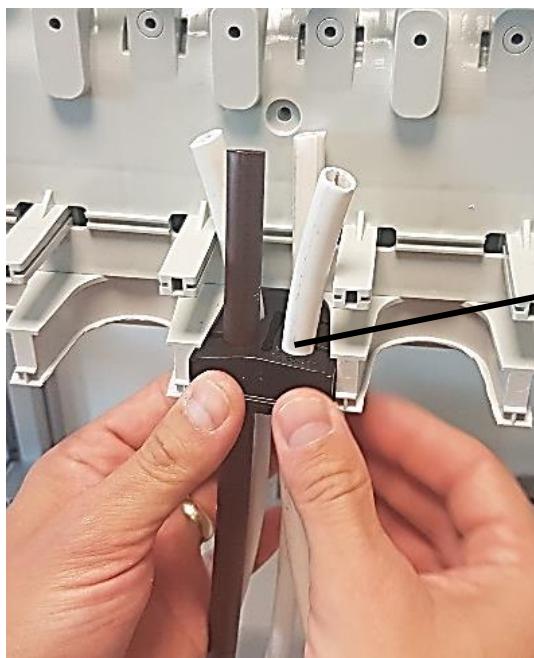

Then we break the cover.
We always use the left input for
the main cables.
We will use the right inputs for
drop cables.

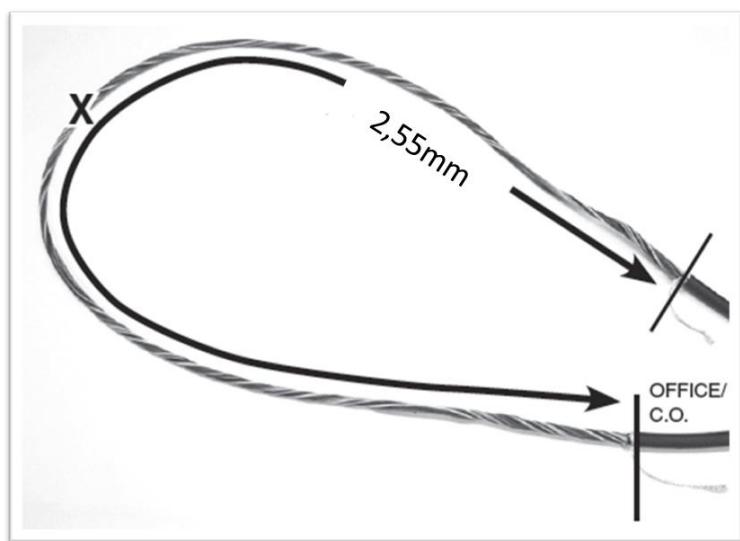

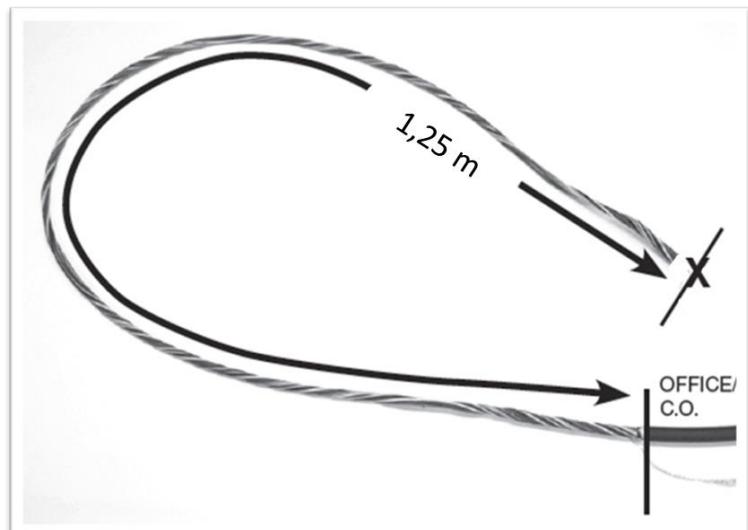

After breaking the
cover, clean the
edges.

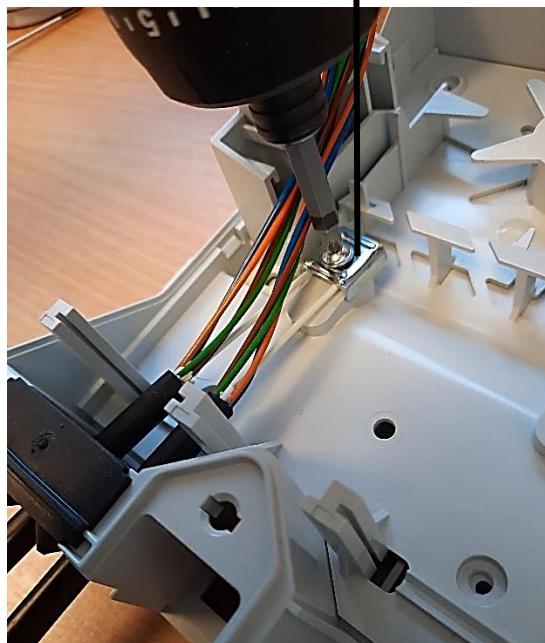

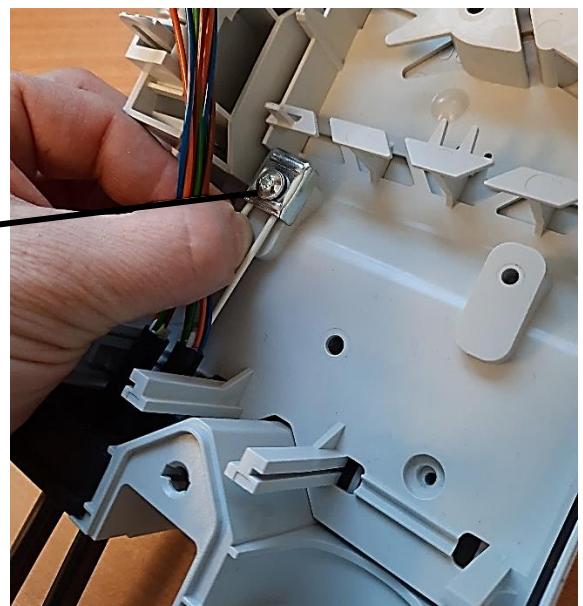

Push the cables through the holes cut.

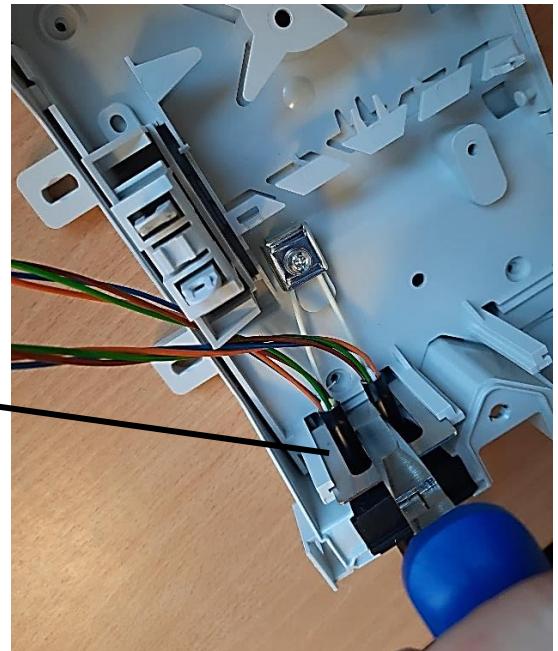

Put the grommet with cables into the groove.

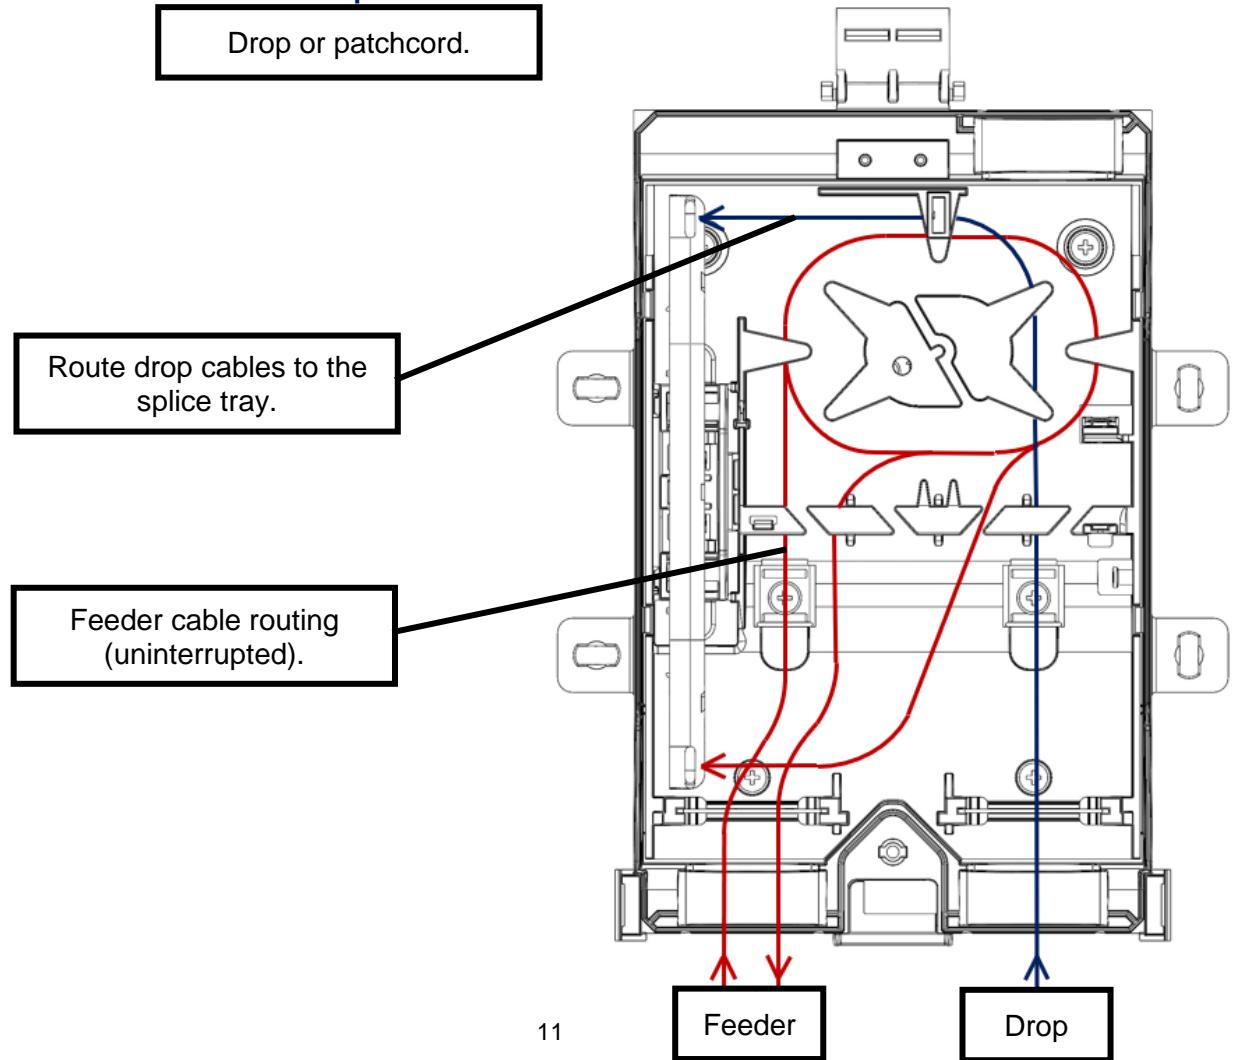

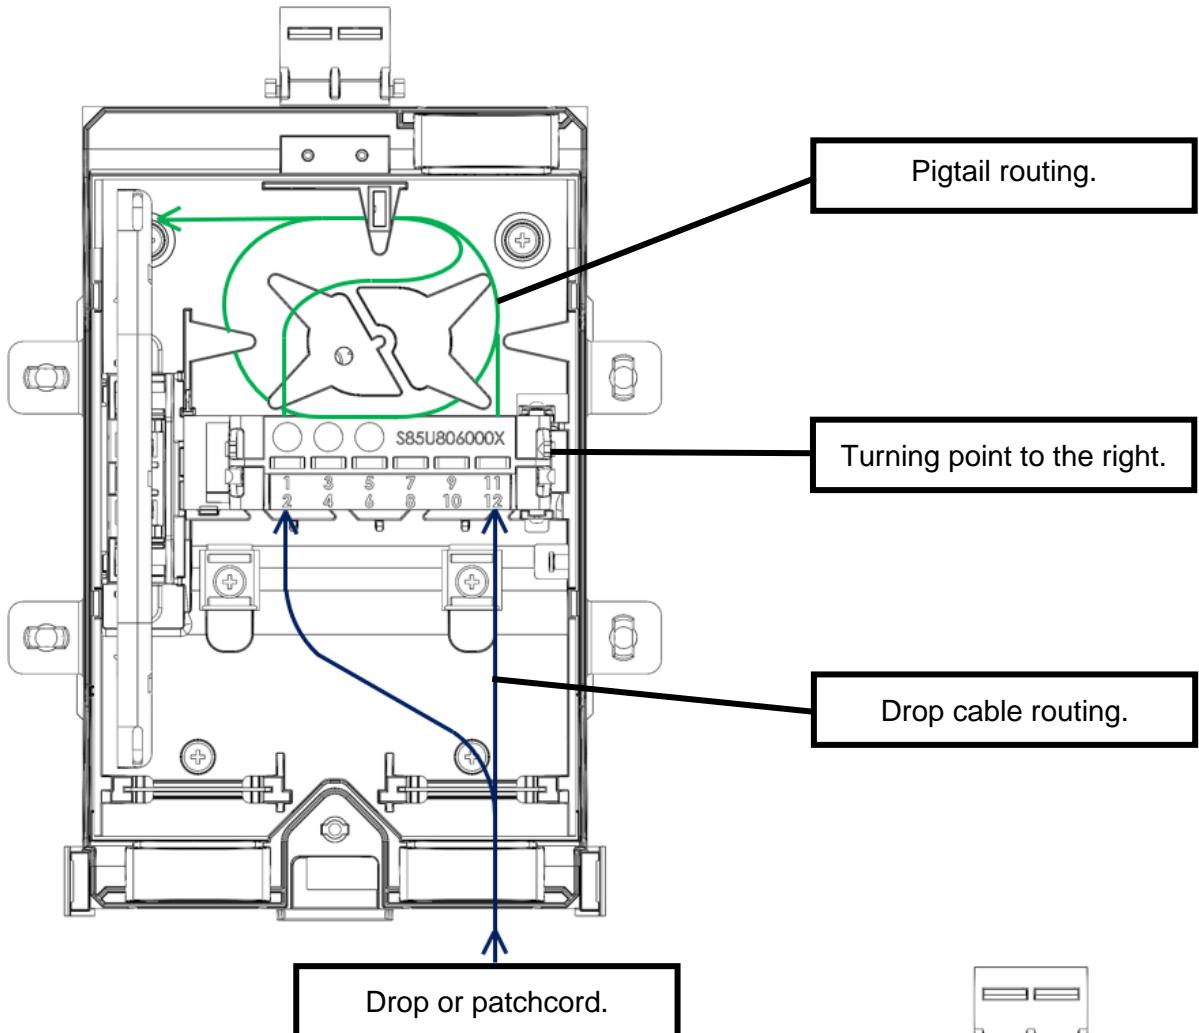

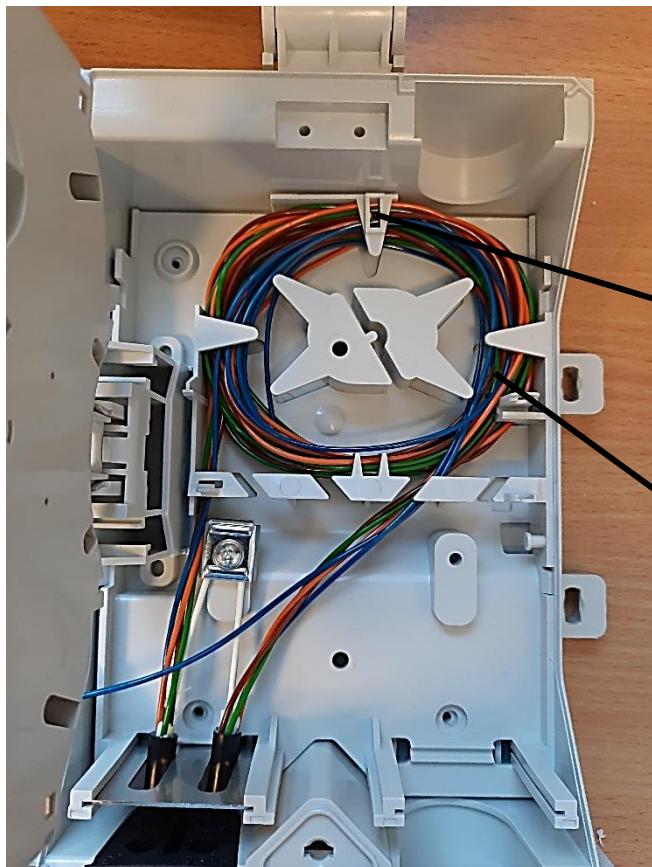

Tensile element fixation.

The fixation fork is part of the grommet set. By sliding slowly from the top into the prepared grooves we cut the fork into the cable sheath.

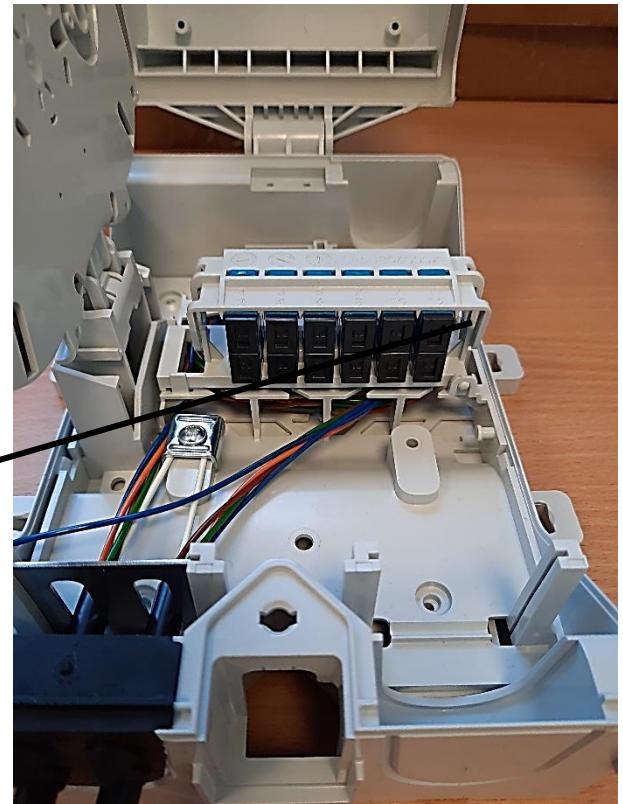

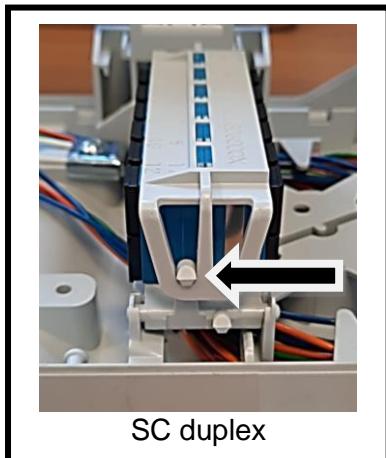

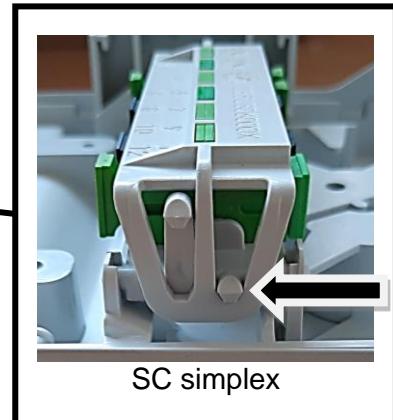

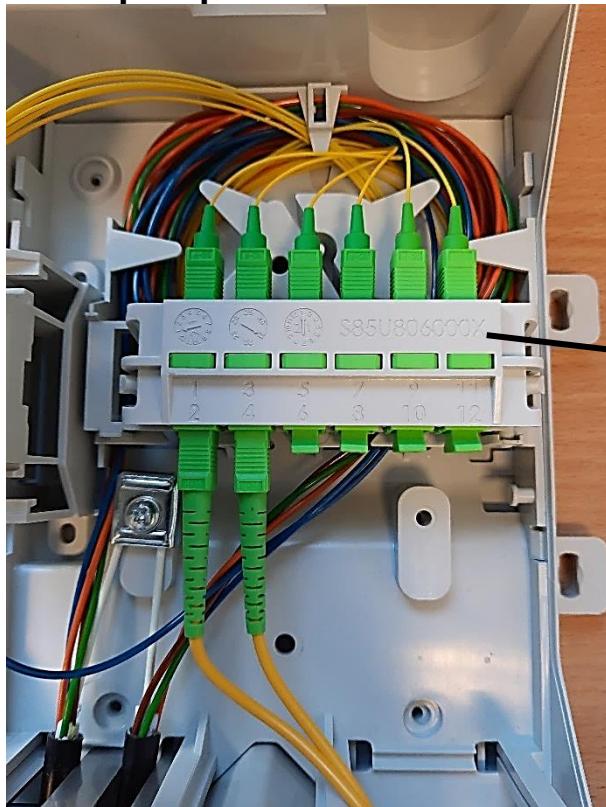

Position to place the adapter.

Storing an
uninterrupted cable
2,25m.

Buffers routing.

4. Adapter panel installation.

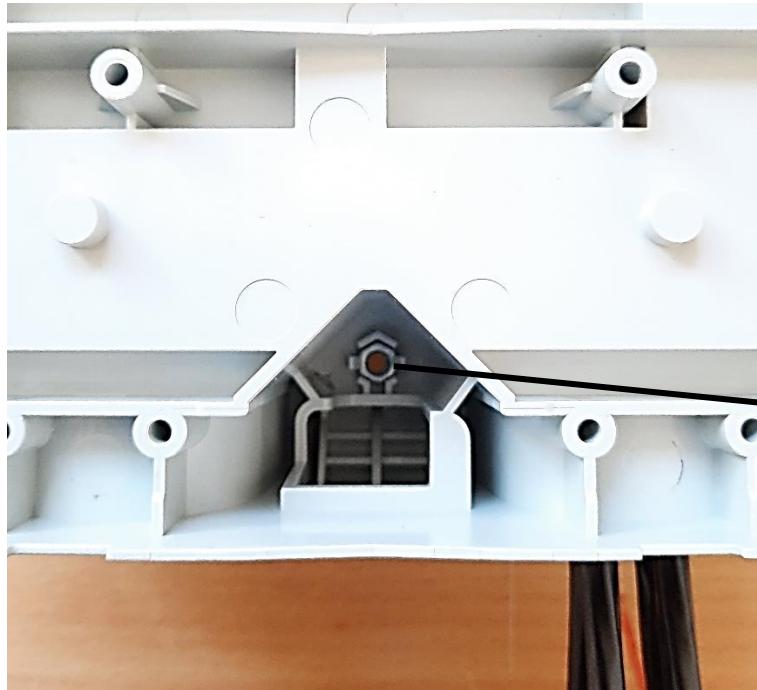

5. Lock installation.

6. Closing the lid with a screw.

Inserting the nut.

Lid closure screw.
Necessity to seal the
box for outdoor use.
